TSX-VENTURE: SBX

**Juan de Fuca Cable-
Joint Aquatic Resources Permit Application Submitted**

Sea Breeze Power Corp. is pleased to announce that Sea Breeze Olympic Converter, LP* ("Sea Breeze OC") has submitted a Joint Aquatic Resources Permit Application ("JARPA") and has completed a State Environmental Policy Act ("SEPA") checklist for the proposed Juan de Fuca Cable ("JDF") Project.

The JDF Project is a submarine electricity transmission cable that would connect Victoria on Vancouver Island, British Columbia with Port Angeles, Washington State on the Olympic Peninsula. The JDF Project would promote a more reliable power supply in both regions, and would help safeguard against emergency blackouts.

Sea Breeze OC is proposing to use innovative, state-of-the-art High Voltage Direct Current ("HVDC") Light® technology. The technology is environmentally sound, and the JDF Project is expected to have no long-term environmental effects. Unlike many submarine transmission lines, new HVDC cables are not oil-cooled and do not pose any danger of coolant leaks or spills. As well, HVDC Light® does not emit a fluctuating electromagnetic field.

The JARPA is a single application used for a number of Washington State and local permits, which will be reviewed by Washington State's Department of Ecology, Department of Fish and Wildlife, Department of Natural Resources, the United States Army Corps of Engineers, the City of Port Angeles and Clallam County.

The SEPA is a Washington State policy that requires state and local agencies to consider the likely environmental consequences of a proposal before approving or denying the proposal. The City of Port Angeles is the lead agency for the SEPA checklist, and Clallam County will also have a role in the review.

* Sea Breeze Pacific Olympic Converter, LP is the US operating subsidiary of Sea Breeze Pacific Juan de Fuca Cable, LP (a joint venture between Sea Breeze Power Corp. and Boundless Energy NW Inc.)

ON BEHALF OF THE BOARD OF DIRECTORS

"Paul B. Manson"
