Juan de Fuca Cable –
Request for Phase II Status in WECC Project Rating Process

Sea Breeze Power Corp., on behalf of its affiliate, Sea Breeze Pacific Juan de Fuca Cable, LP ("Sea Breeze Pacific-JDF") is pleased to announce that a Request for Phase 2 status for the Juan de Fuca Cable Project has been submitted to the Western Electricity Coordinating Council ("WECC").

The Juan de Fuca Cable Project ("JDF Project") is a 550MW High Voltage Direct Current ("HVDC") Light® submarine transmission line that would connect Vancouver Island and Washington State's Olympic Peninsula. On September 7 2006, The JDF Project became the first international merchant transmission line to gain approval from Canada's National Energy Board.

The JDF Project, like all new transmission projects in the region, is required to engage in WECC's 3-phase Project Rating Process to study its expected impact on the regional transmission system.

WECC is the largest and most diverse of the ten regional councils of the North American Electric Reliability Council (NERC), and is responsible for coordinating and promoting electric system reliability across British Columbia, Alberta and the 14 Western States in the US.

Phase 1 of the WECC Project Rating Process for the JDF Project was initiated on October 26, 2004, and an initial "Phase 1 – Comprehensive Status" was submitted to WECC on April 14, 2005.

With the completion of a BC Transmission Corporation Feasibility Study, a Bonneville Power Authority System Impact Study, and a Preliminary Stability Study conducted by ZE Power Engineering Inc., Sea Breeze Pacific-JDF is requesting that the JDF Project be granted Phase 2 status.

During Phase 2, the impact of the JDF Project on the regional transmission system will continue to be studied and feedback from the various stakeholders will be solicited through the convening of a WECC Project Review Group. The purpose of the Project Review Group meeting will be to update the status of the JDF Project, address any early comments received and discuss the scope of the studies necessary to obtain Phase 3 status.

For more information on the JDF Project please visit: www.JDFCable.com

ON BEHALF OF THE BOARD OF DIRECTORS

“Paul B. Manson”
